

Sparkasse app: Making a bank transfer using pushTAN

The following instructions apply to the iOS operating system. The procedure may vary slightly for other mobile phone operating systems.

1 Start the Sparkasse app by tapping the **app icon** and then entering your password.

2 On the homepage, tap the **bank transfer (“Überweisen”)** icon. You then have three options for entering transfer details.

3 Select a recipient under **templates (“Vorlagen”)** or enter the data into the transfer form.

Tip: If you have previously transferred money to or received money from the recipient, the recipient details will automatically appear.

Then tap **send (“Senden”)**. Now switch to the S-pushTAN app (step 5).

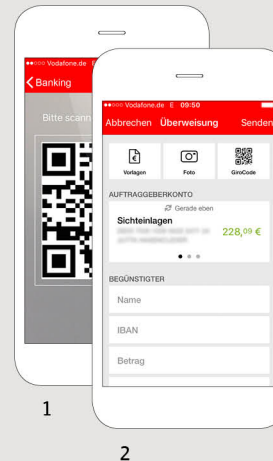

You can also enter the transfer as follows:

3.1 Using the photo option: Tap the **“photo”** icon. Photograph your invoice. The data is transferred to the transfer template. It is vital that you check the data. Continue with steps 4 and 5.

3.2 Using a QR code: Tap the **“GiroCode”** icon. Scan the QR code. The data displays automatically in the transfer template. Continue with steps 4 and 5.

4 Your transfer details are now displayed. Tap **send (“Senden”)**. Now switch to the **S-push TAN** app.

5 A TAN has been generated in the S-push TAN app. **Check** the transfer details against the original documents, e.g. invoice. Then tap on **approve transfer (“Auftrag freigeben”)**. Finished. Your transfer has been sent.
